Product Brief

# DIVA: The Future-Ready Archive Backbone

High-Performance.
Trusted. Cost-Effective.

DIVA

## What is DIVA?

DIVA is a high-performance archive management platform designed to securely manage media across on-premise, cloud, and hybrid environments. It serves as a reliable backbone for modern media operations, ensuring data integrity and predictable performance for archives of any size.

## Why Choose DIVA?

- **Massive Scalability:** Built to handle the largest multi-petabyte archives.
- **Storage Flexibility:** Supports On-prem and cloud storage to avoid vendor lock-in.
- **Media-Aware Intelligence:** Features smart search, previews, and partial restores to move only the data you need.
- **Cost-Optimization:** Intelligently tiers media to reduce storage and egress expenses.
- **Major Price Reduction:** New pricing cuts costs by over 50%, making DIVA accessible for mid-market and smaller media teams.

## Who DIVA Benefits:

| | |
|---|---|
| **News Organizations** | Continuous ingest and quick retrieval for breaking news |
| **Sports Broadcasters** | Rapid highlight reuse and long-term historical archives |
| **Studios (M&E)** | Managing petabyte-scale catalogs in hybrid environments |
| **Corporate Enterprise** | Compliance-driven retention and cost-optimized scaling |

## Latest Innovations

### Unified Search Experience

A single, modern interface for faster, smarter content discovery.

### Enhanced Migration Utility

Automated, zero-disruption transitions from third-party and legacy archive platforms.

### MsQuic UDP Acceleration

Secure, high-speed data transfers for moving content across sites.

### Advanced Analytics

Interactive trend charts to track archive growth and system performance.

### All-in-One Installer

Simplifies setup and ensures consistency across environments.

## 2026 Roadmap Highlights:

### LTO-10 Support

Next-gen capacity (up to 30 TB native) and throughput (400 MB/s).

### Object Storage Lifecycle Management

Automated tiering across AWS, Oracle, Google, and Azure.

### Safe Deletion & Recovery

Flexibility to delete items with the safety net of full recovery.

### Accelerated Tape Migration

Parallel processing to speed up transitions between tape generations.
