

Professional Live Video Streaming

For Mac and Windows

With Telestream's Wirecast, you can easily stream professional-looking video to Facebook, YouTube, LinkedIn, and countless other destinations with just a few clicks.

Engage with your live audience! Bring in remote guests, and display curated social media comments live on-screen in your broadcasts!

Wirecast allows you to produce and stream professional live video using multiple live cameras, remote guests and screenshares, and other mixed media (such as audio clips or image/video inserts). Easily add high-quality production value with features like stinger transitions, instant replay, playlists, built-in titles, chroma key, virtual sets, live scoreboards, clocks, and stock media. Wirecast provides limitless creative flexibility to broadcast professional-looking live internet shows, news, online gaming, sporting events, concerts, church services, corporate meetings, secure internal presentations, lectures, and much more.

Capture Any Audio or Video Source

Wirecast supports an unlimited number of live sources ranging from web cameras to professional and PTZ cameras, as well as remote guests and mobile devices. Connect cameras with USB, HDMI, SDI, NDI, or via a local or remote network. Wirecast supports a large number of capture cards and devices, including many from AJA, Blackmagic Design, Magewell, Teradek, and more. Simply connect your input sources to your computer and Wirecast will recognize them as live feeds.

Bring remote guests in from wherever they are located with Wirecast Rendezvous. Just send a link to anyone on a smart device or computer to join you in your live broadcast.

Easy to Use

Professional production value is not exclusive to large media companies and broadcasters; you don't need to be an experienced video professional to create polished live broadcasts. Wirecast's easy-to-use professional tools make it so all you need is a camera, a computer, and an internet connection to broadcast your video streams to any audience and/or record your show for a high resolution back-up recorded locally, to your disk.

Mix, Match, & Switch Your Media

Wirecast's powerful production capabilities make it easy to switch between multiple live camera feeds while dynamically mixing in prerecorded video, audio, graphics, and slides.

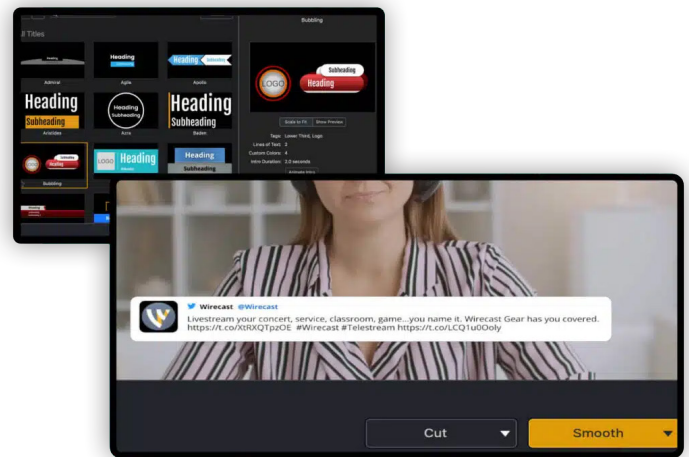

Note: Features described on this page may not be present in all models of Wirecast—please look at the “*Compare Wirecast Models*” table at the back of this sheet to see product differences.

Powerful, Professional Production Features

- **Stock Media Library:** Over 1 MILLION unique, high-quality media assets. A custom-built portal gives you direct access to transitions, motion backgrounds, royalty-free backing tracks, and videos from right within Wirecast. Included with an active Wirecast Access Plan.
- **Stream to Multiple Platforms at the Same Time:** Wirecast allows you to stream and record to more than one destination at a time. Just login with your account name to leading social media platforms or stream to any RTMP or SRT server.
- **Wirecast Rendezvous:** Bring multiple live guests into your broadcast with Wirecast's built-in peer-to-peer conferencing and remote production system. Just send them a link and they can join from any smart device or computer.
- **Multiple User-Definable Layers:** Wirecast's multiple layer support allows live compositing with up to 250 layers and unlimited shots.
- **Video Filters:** Now you are able to have more control over your video assets. With a click of a button you can remove backgrounds, add LUTs or virtual PTZ.
- **NDI Input & Output:** Bring any NDI source on your network directly into Wirecast. Output your program feed via NDI (available in Pro).
- **Professional Titles & Motion Graphics:** Add even more graphics and titles with the integrated Stock Media and Animated Title Libraries.
- **Built-In Screen Capture:** Capture any screen or computer on your network. Perfect for PowerPoint or Keynote presentations, online gaming, or for broadcasting live interviews using Skype or other chat clients.
- **Instant Replay, ISO Recording, A/V Sync, Multi-Viewer:** Packed with professional video features like 17-slot multi-viewing, previewing, and audio/video syncing, with Wirecast Pro you can record any source into a separate file or use for multi-angle replays.
- **Multi-Track, Multi-Channel Audio:** Mix, map, process, and record multi-track audio files, with support for ASIO compatible devices (available in Pro).
- **Playlists:** Queue a list of multiple videos, images, audio, or live shots to play successively.
- **Chroma Key:** Transport your production to a new studio or location using Wirecast's high-quality, GPU-accelerated, real-time green screen solution.
- **Live Scoreboards & Clocks:** Use the built-in scoreboards, live clocks, and timer templates to track scores and play time for live action sporting events.
- **Audio/Video Controllers:** Switch shots, fade and balance audio, and more with built-in support for common hardware interfaces such as the AKAI APC40 mkII, Novation Launchpad, XKeys, and Elgato StreamDeck.

- **3D Virtual Sets:** Create a virtual TV studio environment with Wirecast Pro's built-in sets.
- **Local Wifi Camera (iOS):** Added unlimited iOS camera sources on your Local Area Network (LAN) using Wirecast Go's free local camera feature.
- **Built-In PTZ Control:** Pan, tilt, and zoom with your PTZ cameras using our built-in control interface (which supports VISCA/IP and NDI). Visit our website for a full list of supported VISCA/IP cameras.
- And much more...
